Water Rights
55 East 100 North
Logan, UT 84321-4624

Dear Mr. Fotheringham:

We appreciate your quick response to our request on better record keeping of water produced from the Hy Bair Spring. I let the council read your letter and discuss which direction they would like to take.

The request was not on how the water is regulated by users, but to have all users equipped with required measuring devices that will record accurate flows. The council unanimously agreed to your alternative to organize a distribution system and keep records of total flows from the Hy Bair Spring. One member commented that if Lewiston City is the only one metered, and there is a problem metering the others, then why don't we pull ours out and just guess like everyone else.

Let us know if we can help in any way to resolve this problem.

Sincerely,

Greg H. Karren
